Subject: Breed bans

At this time, the extent of our position statement is that CVMA is opposed to legislation or ordinances that ban animals on a breed-specific basis. We are actively engaged on this issue in Colorado, and with other stakeholders will be developing materials to help Colorado communities address dangerous dog issues on a more comprehensive basis with, hopefully, some consistency throughout Colorado municipalities.

I presume you have obtained information from the national organizations, such as AVMA, HSUS, AHA, and AKC.

Cheers,

Ralph
